CERTIFICATES

SEO (Search Engine Optimization) 🔗

Proven expertise in keyword research, link building, image optimization, and creating robots.txt files to enhance website visibility and ranking on search engines.

PROJECTS

Automated Airbnb Reservation Process,

Tools and Technologies: Selenium WebDriver, TestNG, Maven, Java, JSON Server, Eclipse IDE. 🔗

The project involved opening the Airbnb website on the Edge browser, entering "Kasol, Himachal Pradesh" as the location, and selecting specific travel dates and adding guests. The automation script then applied the "Amazing Views" filter, change the region and selected a suitable property, and completed the booking process.

Ebay Registration Automation Testing,

Tools and Technologies: Selenium WebDriver, TestNG, Maven, Apache POI, Git, Chrome. 🔗

Automated testing of the eBay website using test cases stored in an Excel sheet. Enhanced test efficiency and coverage by utilizing DataProvider for parameterized testing.

REST Assured API Testing with JSON Server,

Tools and Technologies: REST Assured, TestNG, Maven, Java, JSON Server, Apache POI. 🔗

Implemented REST Assured concepts, including GET, PUT, PATCH, POST, and DELETE methods. Integrated data fetching from Excel using data providers for comprehensive testing.

Marketplace Automation, Technologies: Selenium WebDriver, TestNG, Maven, Java, Eclipse IDE. 🔗

Developed an automation suite using Selenium and TestNG to streamline the process of user registration and session booking on the AlignTogether marketplace.
